

**CORE DESIGN Co.**

# Innovation Inspired by Nature...

CORE Design Co is a subsidiary of CORE Landscape Products. We design, manufacture and supply high quality, innovative metal products for interior & exterior applications. Focusing on the design led development of practical & ornamental landscaping products that are built to last and designed to require minimal maintenance.

We are proud to say our products are manufactured in strict accordance with ISO 9001 standards. These standards are implemented from raw material acquisition to delivery of the finished article.

Each and every product is specifically designed to provide an aesthetically pleasing & practical solution to aid both professionals and novices in the design and installation of creative Landscape projects, whilst minimising the impact of construction on the environment. Where possible we source recycled materials to engineer our products, reducing our carbon footprint.

Screens for Planting Areas.	3-4

Full Height Privacy Screens.	11-12
Fence & Pier Infills.	15-16
Accessories.	17-18
Light Towers.	19-20
Fire Pits.	21-22

## So Many Possibilities...

Formed using the latest CNC laser cutting, punching and folding technology we produce decorative screens, light towers and fire pits of the highest quality with totally unique patterns.

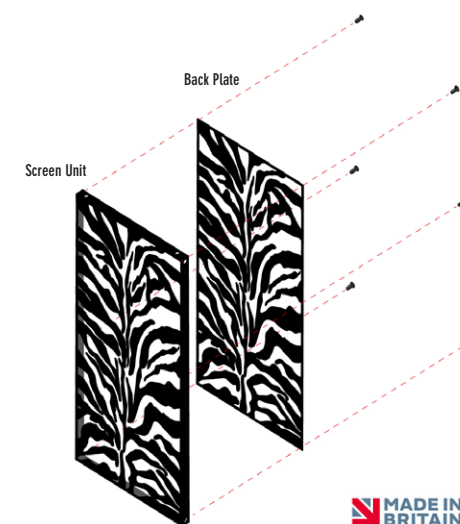

Our modular panels connect to create the most amazing **Garden Screens**. Manufactured from 1.6mm powder coated galvanised steel or Cor-Ten weathering steel, with each finish ensuring our modular screens are guaranteed to withstand the test of time and the harsh UK climate.

We fold and fabricate our front screen units into thin (20mm), incredibly strong box-like sections, that easily bolt together to form ever-expanding designs. An optional (2mm) flat back plate can be added to the front screen unit to form a unique hollow 3 dimensional screen with a perfect 360° degree viewing angle.

By utilising our CDC FRAME, a range of posts, rails and fixings, you can easily create screens of all shapes and sizes: free-standing full or half height privacy screens; screens for planting areas; fence and pier infills; room dividers or individual garden art.

For the ultimate garden chic, add our LUX LED lighting to any configuration to create a real focal point. A complete range of dimmable RGB waterproof LED lighting and cabling that conceals within the screen, with over 64000 colour combinations and a tactile joy wheel remote control, you can manually blend colours to achieve the perfect setting.

Our modular screen system offers professionals and DIY-er's an easy way to create, frame and install their perfect decorative screen project.

Both our Light Towers & Fire Pits create individual garden art during the day and illuminate into enchanting light sculptures at night.

Our free-standing **Light Towers** are designed to compliment our screens using the same designs and colours. Perfect for both commercial and domestic applications.

Our weathered steel **Fire Pits** are a powerful addition to any project and look great with or without flames. Available as full spheres or half bowls in a unique range of designs.

We hold huge stock of all products at our UK distribution center for immediate delivery.

# Screens for Planting Areas.

## Single Screen with Slim-Line T-Bars.

PRODUCT VARIATION		RRP (£)
Single Sided Powder Coated Screen with pair of 2400mm Tbar posts Available in Black (Ral.9005) or Ghost Grey (Ral.7047)	Single Sided *with Back Plate	£144.99 £179.99
Single Sided Cor-Ten Screen with pair of 2400mm Tbar posts Cor-Ten Weathering Steel (ruined effect)	Single Sided *with Back Plate	£154.99 £189.99

Bamboo Shoots.

Arabian Geometric.

Zebra Print.

### Package Components

- Screen (1200x600x20mm) x1
- Slim Line T-Bar (2400mm) x2
- Allen Key Nuts & Bolts (15mm) x8
- \*Optional Back Plate (1200x600mm) x1

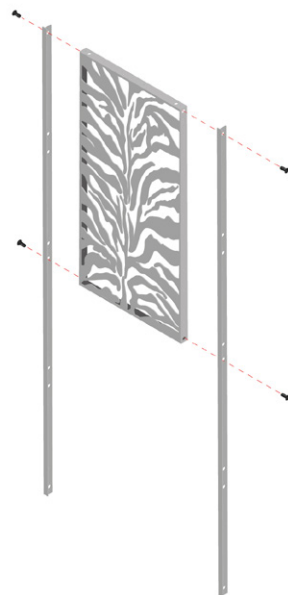

## Variable Height Planting Screen.

Our modular metal front screen units combined with our slim-line T-Bar support posts create the perfect backdrop to plant against.

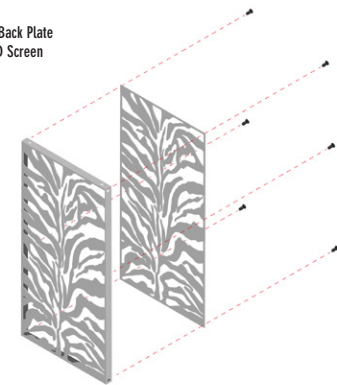

The T-shaped support posts are incredibly unobtrusive and extremely strong with pre-drilled fixing holes, allowing for variable height adjustment using the small bolts and locknuts supplied. At only 22mm wide they are easy to install in established borders amongst existing flora with minimal disruption and can be simply knocked into firm ground or set in concrete.

The hollow channel within our front screen unit allows for the installation of optional remote-controlled LUX LED lighting whilst the T-Bar is ideal for concealing the low voltage cabling.

By adding colour and warmth you can create a focal point when low light obscures the true beauty of your planting.

Screen Unit with optional Back Plate to make a double sided 3D Screen

IP68 LED Light Bars concealed in screen channel.

Screen unit fitted with optional back plate.

Bamboo  
Shoots.

Arabian  
Geometric.

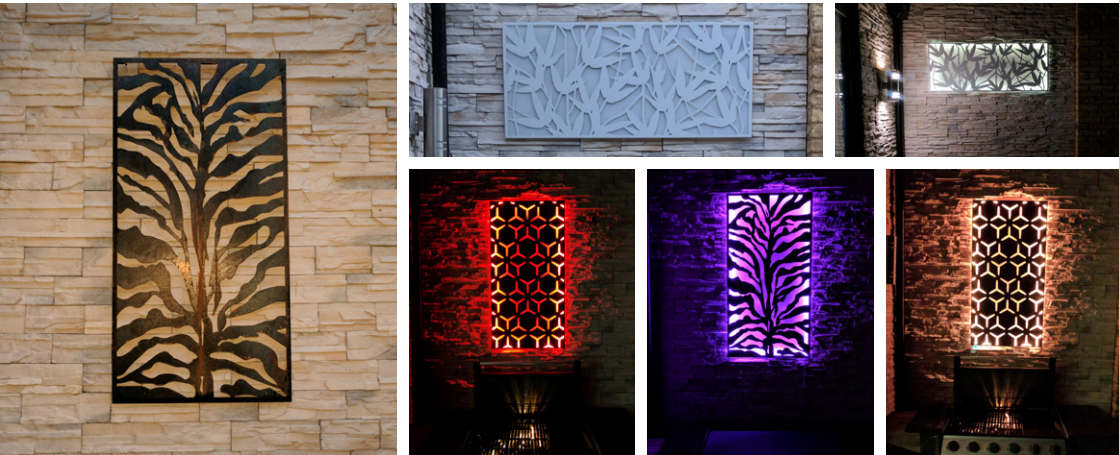

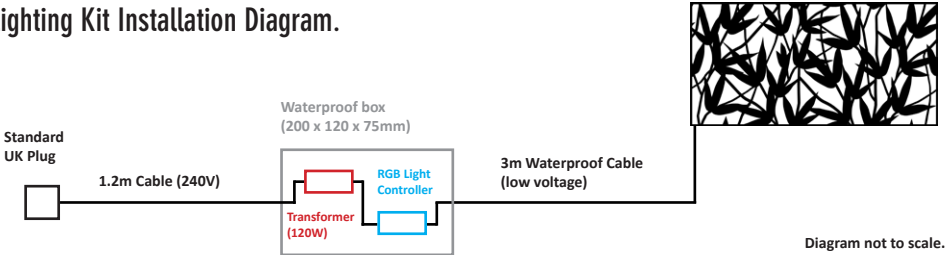

Zebra  
Print.

## Creating your own frame...

Our 2mm flat back plates provide a more traditional method of screening unsightly objects or old tired fencing.

By creating a wooden sub frame to support the screens, you simply butt the screen edges together and screw the flat plates to the frame using the pre-drilled countersunk holes and colour coded 25mm screws supplied with the screen.

With a 20yr+ lifespan and low maintenance finish, they not only look great, they offer great value for money.

Available in Jet Black and Ghost Grey polyester powder coating or Cor-Ten Weathering Steel.

The modular construction allows ever expanding designs that compliment urban and traditional garden designs.

# Screen Extras & Accessories.

# Light Towers.

## LED Light Towers.

PRODUCT VARIATION	RRP (£)
<b>Powder Coated LED Light Tower (265 x 265 x 1800mm)</b> Available in Black (Ral.9005) or Ghost Grey (Ral.7047)	£239.99
<b>Cor-Ten LED Light Tower (265 x 265 x 1800mm)</b> Cor-Ten Weathering Steel (rusted effect)	£249.99

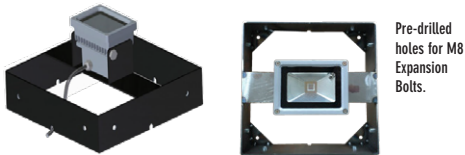

### FREESTANDING LIGHT TOWER

LED light towers for both interior and exterior use. Made from 1.6mm galvanised steel with a polyester powder coated finish or Cor-ten weathering steel.

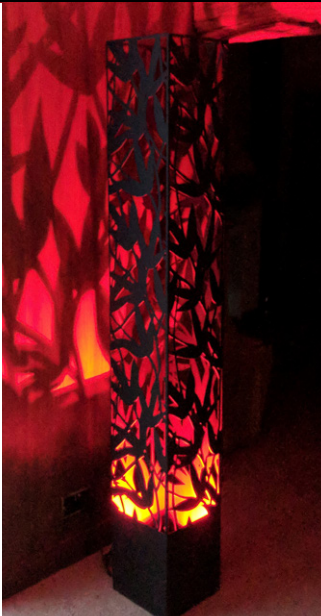

### COLOUR CHANGING LOW VOLTAGE LED LAMP

Complete with a 10W IP67 RGB LED flood light – Fully dimmable with radio frequency remote control – Supplied pre-fitted with a UK 3 pin plug. The outer steel body remains cool due to the low voltage LED lamp.

### SECURE GROUND FIXING

The base for the LED light towers easily bolts to the ground using the expansion fixings supplied. The main body of the light tower simply slips over the base unit and secures using the countersunk fixings and pre-threaded holes in the base unit. This makes the LED light tower a perfect choice for outdoor areas or commercial applications where safety is always paramount.

# Fire Pits.

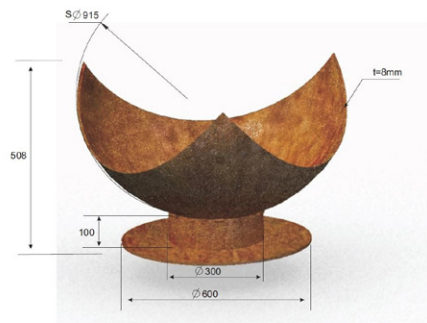

## Outdoor Fire Bowls & Spheres.

Each fire pit is crafted using the highest grade 8mm steel which quickly develops a warm rustic iron oxide patina that blends in well with any garden setting.

We offer a complete range of laser cut fire bowls and spheres to enhance any outdoor space and create an amazing focal point with or without flames!

Our unique base design provides a safe, free-standing fire pit, that can be positioned on any non-combustible flat surface. Alternatively you can pave over the base plate to create the illusion of a floating sphere just above the surface.

Each creation comes with an all-weather cover to keep it warm when it's not in use.

Within the base there is a small drainage hole to prevent rainwater collecting, keeping it dry and ready for use at all times.
